

1. Simultaneously helping himself and the school, carpentry student and senior Curtis Stephens, along with his classmates, aided the school by fixing different odds and ends around the school. "Right now we're doing a project in machine tool. We're almost finished with fixing counter tops from the High School," Curtis said.

2. Appreciative of a good teacher and a well structured class Junior Melanie Coulter had no problem offering accolades to Mrs. Daniels. "She's a good teacher and she spends a lot of individual time with each student," Melanie said.

3. Advancing student's common knowledge of computers and preparing others for careers in the field, TCTC's engineering class was truly a valuable one. "This class teaches me about the field of computer which I want to go into," sophomore Brian Colvin (seated) said. "I view this class as a prerequisite to my college major of networking communications and management," said senior Cory Williams (standing).

ing to the proverb that practice made perfect, Porsche perfected her money managing skills by working on ledgers. "I've had hands on experience in managing ledgers, and there are ways of sorting things out by putting money in categories," junior Porsche said.

Freshman culinary arts student and future culinary chef Darian Greenwell worked hard and learned the basics in her entry culinary arts class. "[So far] I've learned how to make cookies and properly cut potatoes," Darian said.
