Colleton County High School

[Seniors](#)[Student Life](#)[Academics](#)[Sports](#)

Throughout the short years spent at Colleton County High, people were given opportunities to share their "myspaces" to create "our space". From real relationships to unrecognized ones, those were the circumstances that made "our space". People parked in the same parking lot everyday, they shared a lunch period, or they had the same teacher at different times. Unknowingly, each person became connected in some way during high school, which was the key factor to "our space".

The purpose of Myspace was to display who a person was; his friends, his thoughts, his interests-his life. Like the trendy creation from our good friend Tom, the creator of the popular website, figuratively speaking, everyone had a "myspace". Each person had their own thoughts and friends, likes and dislikes.

The years of high school were granted for the purpose of developing one's "myspace": learning about oneself through new experiences and relationships. By creating the individual spaces, through Colleton County High, the spaces emerged to make everyone's space.
