While eating lunch Christopher Weekley was asked about his thoughts on AP classes. "They are higher level classes that are weighted heavier on your GPA and, if you pass the national exam you earn college credit," junior Chris said.

Chris's Friends!

After eating 2nd lunch in the Common's, Renee took time away from studying for an AP Government test to tell us about her AP class. "The class is a college type class, it puts you in that sort of situation where you'll know what to expect from college and it forces you to teach yourself to be more organized," said junior Renee Brooks.

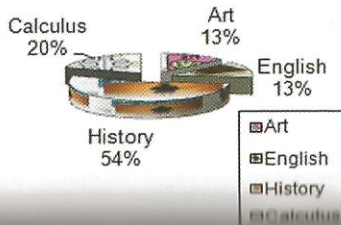

Senior Ashley Hardee was also eating 2nd lunch in the Common's when she relived her past experiences from taking AP History. "The class prepared me for college and gave me a deeper understanding of the subject," Ashley said.

College...In High School ?

Though said to be difficult, it seemed as if every junior and senior at CCHS was taking at least one AP class. So what is an AP class? AP stands for Advanced Placement classes. They are classes set up to parallel college courses; students can acquire a free college credit if they pass the national exam at the end of the course and they could gain their personal satisfaction that there is hope for them when or if they enter college.
