

TO THE GRADUATES, '68

As you take the second step along the highway of life, may you pursue careers of satisfaction in usefulness to yourself, to your fellowmen, and to God.

We have tried to provide opportunities through administration, guidance and counseling and teaching. You have opportunities available that have never occurred before. Why not stop, Look, Read, Listen, and Think, so that you may avail yourself of the chances that are now yours. Then you will prove your worth in many occupational areas. Let your love for Colleton be reflected in your determination to fulfill your highest hopes, thereby making worth while contributions.

Remember "Seniors", "It is better to work toward than dream about your future."
