

1993 — The year. The year to make straight A's, to score that touchdown, to fall in love, to learn to read.

When students reported to class on Monday, August 24, they were greeted by newly painted lockers and halls, thanks to the efforts of YAB. Teachers had also jumped on the bandwagon and painted their rooms. Mrs. Betty Fischer, fourth grade teacher, stated "All I had to do was pick the color and the parents of my students saw that my room was painted. Doesn't it look great?"

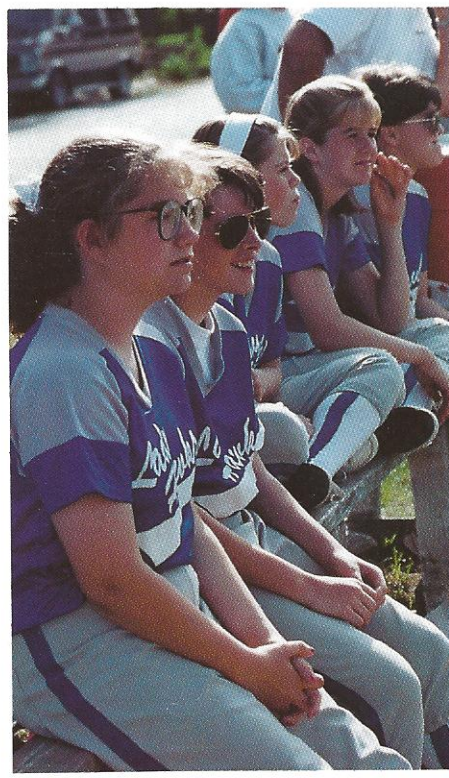

The library had also received a face-lift over the summer. Fourth grader, Kevin Dennis, summed up the feelings of many — "It looks better and the new AC

makes it feel better. The new books are great too."

1993 brought more than change in color to classrooms. In Senior Physics for example, girls participated for the first time. "We've overcome the stereotype of Physics being a male dominated subject here at CPA," commented Harper Kinsey. "Having Mr. Quarles as a headmaster and teacher makes me actually do my homework."

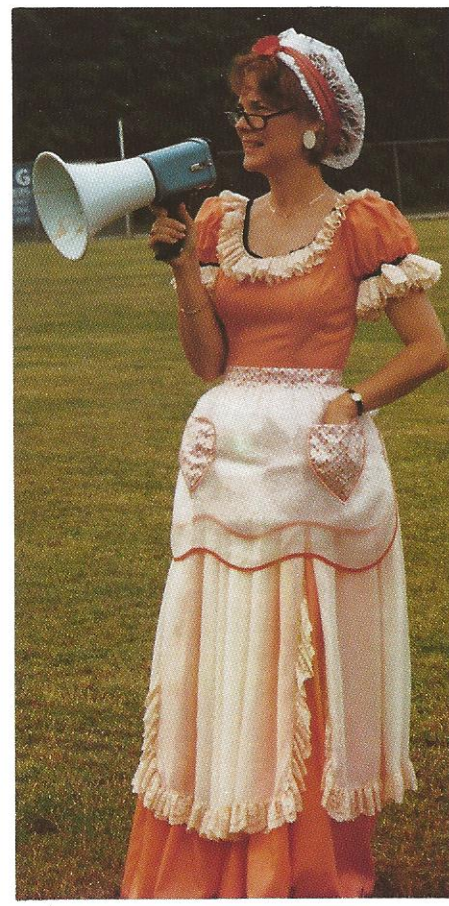

1993 brought about an event not soon to be forgotten. Who would have thought that on Oct. 23, Mr. Quarles and Mrs. Stone would fulfill a promise made if enrollment went above 300. It did and they did — dance that is. Enrollment was 316.

Sitting the bench? No, Jennifer Beach, Christy Fagnoli, and Amy Godley are waiting to bat. Softball, just like baseball and golf gives students an opportunity to participate in spring sports.

We've been slimed! Joe McConnell, Garnett Johnston, Angie Sweat, and Jarred Sumner discover the property of viscosity after mixing cornstarch and water. Cleaning up is NO fun!

Old Mother Hubbard Brightwell calls all her children to gather around to tell her their favorite character from a book. Mrs. Brightwell believes in sharing the joy of reading.

"Our emphasis for 1993 will be to continue to strengthen and improve our academic program. Significant additions to the library, both in printed material and computerized reference programs, will support increased research work by students."
 — Raymond Quarles, Jr., Headmaster

"I like the math program they have for us this year and the library books are more for our age."
 — Ansley Bailey, 5th

"When thinking of 1993, I have mixed emotions. I'll miss high school, but I am definitely looking forward to college."
 — Anne Clamp, 12th
