

Ready For The World

Kindergarten graduation — what an important time! Young minds, fresh faces, just ready to conquer the world. After a year of addition and the alphabet, these students were ready to move on to bigger and better things — like reading! The shy five year olds had turned into more responsible young people. They had learned about sharing and making friends, respecting and listening to authority — lessons all of us can learn from.

As the kindergarten teacher breathed a sigh of relief, thirty-six young hopefuls were unleashed — ready for the world!

Kelly Smith and Kimberly Gilmore manage to remain calm during the frenzied preparations for the big night.

Look out world — this is the Class of '98! Lining up for their family and friends, these promising-looking students will do great things in their time.
