Mrs. Nell Simmons

Social Studies

" . . . and this is a problems class. "

The history department is headed by MRS. NELL SIMMONS. The department offers civics, world history, American history, and American government. Civics and American government explain the working of our system of legislature. World history is the story of mankind's development from his earliest appearance on earth to his life in the twentieth century with special emphasis on the scientific, cultural, and artistic accomplishments of each nation. American history goes into detail about the founding of our country and its growth. This helps the student understand things that are going on in the world around him.

"This is where we sent Spikey to summer camp. "
