

SCIENCE CLUB

Does Mrs. Lythfield approve of Henry's suggestion to take the Science Club to Las Vegas instead of Oak Ridge?

The purpose of the Science Club is to organize students interested in the sciences so that they may pursue this study outside the regular classroom and to inform the members of current scientific developments. To be a member, one has to have had chemistry and to have taken or be taking Physics. Industries, such as Canady's steam plant, Santee Cooper, and Deering Miliken, were visited to let members see the advances in technology they had studied about. Many members studied other advances at Lake Murray during the annual JETS convention.

FIRST ROW: Henry Dyson, President, Thomas Key, Vice-President, Mary Zipperer, Secretary, Karen Shook, Treasurer, Mrs. Lythfield, Sponsor. SECOND ROW: Ken Richardson, Scott Crosby, Frank Stanley, Wendell Crosby, Alan Gardner, Ricky Dean, Kennmeth Braunstein.
