In the spring of 1974, WHS hosted the Regional DE Competition. Students competed in various marketing and sales related contests. The DE Club is a branch of the regular DE class.

Students receive on-the-job training in sales related work. Mr. Jarvis sponsors the club and works with employees in placing and training students.

The T & I Club is also job-related. It informs students of jobs in the trade and industry areas.

At Colleton High, the Math Club is sponsored by Mrs. Clark and Mr. Bryan. The purpose of the club is to promote and encourage a better interest of Math for students.

The Science Club, sponsored by Mrs. E. Williams and Mrs. Steedly, aimed to establish scientific attitudes toward science. The club visited such places as Charles Towne Landing, the Planetarium in Charleston, and several local industries.
