

Tinkering with technology. Printing report cards, Assistant Principal **Charles Locklair** works on one of the most important pieces of technology at the school. "I know students would rather not have their report cards printed, but it's our responsibility to get them to the parents," said Mr. Locklair.

Future Aerospace Engineers of America. Working hard towards his future of becoming an Aerospace engineer, senior **James Maree** takes computers very seriously. "I want to major in computer science in college because I want to be an Aerospace engineers. I will pretty much design technology," said James.

Deep in thought. Concentrating on the work at hand, **Maryann Bird** depends on computers to get her job done. Mrs. Bird taught and worked part time for the Technology Center. She dealt with all the networking and computer crises in the school.

Getting serious. Studying in Health Occupations, senior **Stephanie Regalado** hopes to decide what medical career to pursue. "I know that I want to be a doctor of some sort, but I am undecided because technology changes so rapidly in that field," said Stephanie.
